

RIEDHAMMER
committed to your needs

**ENERGY SAVINGS AND
EFFICIENCY ENHANCEMENT**

REVAMPING STRATEGY

**NEW PRODUCTION
STRATEGIES TO TAKE
YOU INTO THE FUTURE**

Following an initial inspection of their existing kiln plants, we offer customers an in-depth consulting service on plant maintenance or plant modernisation/optimisation, focusing on:

- Reduction of energy consumption and energy recovery
- Higher output with improved, repeatable quality
- New or improved display systems
- Automation and handling systems
- State-of-the-art MCS (Measurement and Control System) technology
- Safety equipment upgrades to EN 746 standards
- Optimisation of the entire plant
- Advice on exhaust gas scrubbing systems to meet environmental standards

RIEDHAMMER REVAMPING CONCEPTS

OLD KILN TECHNOLOGY:

- Low efficiency
- High energy consumption
- High operating cost
- Low flexibility

MODERN KILN TECHNOLOGY:

- Low investment cost
- High efficiency
- Low energy consumption
- Low operating cost
- High flexibility
